Embed payments
directly into your **software**

Modulr
AP & AR Platforms

We know the pressure you face to deliver more and make your software even easier for your small business and enterprise customers alike. We also know that the world of AP & AR is unnecessarily manual with high labour costs and human errors. We want to make manual file uploads to pay suppliers and HMRC. We also want to put the power of instant payments and notifications in your hands for 24/7 access to make payments. Bye-bye missed due dates.

Modulr helps AP & AR software providers become FinTechs without the regulatory, payment scheme access or technological burden. Embed our payment services through one API in weeks.
Our Services for AP & AR software providers

Offer each corporate client a dedicated business account with fund notifications and easy Direct Debit top ups.

Get full visibility on reporting & data analysis for faster reconciliation on payables and receivables for ultimate productivity.

Keep track of salaries and invoices with instant notifications when payments land.

Benefits

Create customer stickiness by extending your software to handle payments execution.

Streamline reconciliation and save your customers hours of admin and people power.

Easily integrate new payment services into core products and translate your offering into new markets.

Give your customers full visibility and control over all payment flows with instant 24/7 payments for emergencies and one-offs.

Receive instant confirmation of payment and matching invoice amounts via API.

Offer an alternative to cards for receiving funds that's cheaper and faster for merchants.

Results/customer testimonials

"We chose to work with Modulr, the next generation digital alternative to banking, because of their deep experience in payments infrastructure, their foresight to innovation and their commitment to serving businesses across the UK who sorely needed better payment capability."

Chris Downing, Director for Accountants and Bookkeepers, Sage

About Modulr

Modulr is the Payments as a Service API platform for digital businesses. Modulr's new type of payment accounts are built for businesses that need a faster, easier and more reliable way to move money.

Businesses can automate payment flows, embed payments into their platforms and build entirely new payment products and services themselves. All managed in real-time, 24/7 from one API. We've processed over £100bn for the likes of Revolut, Sage, Wagestream and Hyperjar.
