Embed payments
directly into your **software**

Modulr
Account & ERP software

We know the pressure you face from your growing small business and accountant customer base to make your software even easier and deliver more. You know you'd like to offer a seamless accounting and payments experience, but you and your customers have to make do with manual file upload which means admin, fraud and costly mistakes.

Modulr helps accounting and ERP software businesses become FinTechs without the regulatory, payment scheme access or technological burden. Embed our payment services through one API in weeks.

Our Services for Accounting & ERP software

Fully functional alternative to business bank accounts with in/out payments and spending cards.

Automatically push payments when instructed via secure API, with suitable approval access for each client account.

All managed by a dedicated Payments Dashboard and Client Manager for delegates to easily manage client accounts.

Benefits

Make payments instantly via our direct access to the Faster Payments scheme or SEPA Instant in Europe. Missed deadlines are a thing of the past.

Fully secure API integration meaning all payment instructions are transferred automatically without manual error-prone intervention.

Manage salary and supplier payments in one place. Businesses can track and trace payments for audit and cashflow optimisation.

Create customer stickiness with an Accounting + Payments proposition to rival new business banks.

Payments functionality designed for accountants and with their complicated ecosystem in mind for ultimate adoption.

Seamless and automated reconciliation of payments takes away the admin headache, while one-off emergency payments are a breeze through File Upload or in the Customer Portal.

Results/customer testimonials

"We chose to work with Modulr, the next generation digital alternative to banking, because of their deep experience in payments infrastructure, their foresight to innovation and their commitment to serving businesses across the UK who sorely needed better payment capability."

Chris Downing, Director for Accountants and Bookkeepers, Sage

About Modulr

Modulr is the Payments as a Service API platform for digital businesses. Modulr's new type of payment accounts are built for businesses that need a faster, easier and more reliable way to move money.

Businesses can automate payment flows, embed payments into their platforms and build entirely new payment products and services themselves. All managed in real-time, 24/7 from one API. We've processed over £100bn for the likes of Revolut, Sage, Wagestream and Hyperjar.
