Embed payments
directly into your **software**

Modulr
Payroll software

We know the pressure you face from your growing small business and accountant customer base to make your software even easier and deliver more. You know you'd like to offer a seamless payments synced payroll experience, but you and your customers have to make do with manual file upload which means admin, fraud and costly mistakes which leaves employees out of pocket.

Modulr helps payroll software providers become FinTechs without the regulatory, payment scheme access or technological burden. Embed our payment services through one API in weeks.

Our Services for payroll software providers

Automatically sync payroll entries to payment instructions via secure API with suitable approval access and automated reconciliation to reduce admin.

Get full visibility over payment flows including instant payment notifications for ultimate productivity.

All managed by a dedicated Payments Dashboard and Client Manager for delegates to easily manage and invite client accounts.

Benefits

Make payments instantly via our direct access to the Faster Payments scheme or SEPA Instant in Europe. Missed deadlines are a thing of the past.

Fully secure API integration meaning all payment instructions are transferred automatically without manual, error-prone intervention.

Manage salary and supplier payments in one place. Businesses can track and trace payments for audit and cashflow optimisation.

Create customer stickiness with a Payroll + Payments proposition to rival new business banks.

Payments functionality designed for accountants and with their complicated ecosystem in mind for ultimate adoption.

Seamless and automated reconciliation of payments takes away the admin headache, while one-off emergency payments are a breeze through File Upload or in the Customer Portal.

Results/customer testimonials

"We are delighted to be able to offer this facility to our customers. Having spent a large part of my career as a practising accountant (with a payroll bureau service), I know just how time consuming the process of paying employees can be and still is to this very day. This changes everything!"

Paul Byrne, FCA ACIPP, CEO at BrightPay

About Modulr

Modulr is the Payments as a Service API platform for digital businesses. Modulr's new type of payment accounts are built for businesses that need a faster, easier and more reliable way to move money.

Businesses can automate payment flows, embed payments into their platforms and build entirely new payment products and services themselves. All managed in real-time, 24/7 from one API. We've processed over £100bn for the likes of Revolut, Sage, Wagestream and Hyperjar.
