Embed payments
to provide ultimate on-demand **pay flexibility**

Modulr
Wage Advance

We know the high standard of flexibility employers and gig companies expect your software to deliver to their staff. We also know delivering that much payments flexibility requires total control of the complex financial ecosystem you find yourselves in. Imagine if you could trace and reconcile each salary draw down, have full oversight on reporting, offer instant pay-outs 24/7 and notify employers and employees as soon as salaries land.

Modulr helps On-demand pay platforms become FinTechs without the payment scheme access, regulatory or technological burden. Embed our payment services through one API in weeks.
Our Services for On-demand pay platforms

Offer individual accounts (and pay cards) for each employee and automatically generate notifications to on-demand pay firms with receipts.

Leverage Modulr's direct access to the Faster Payments scheme for reliable uptime and a true 24/7 service.

Track and trace payments throughout the ecosystem, with automatic sweeps of applicable fees. Confirmation of Payee also assures you're paying into the right account.

Benefits

Automate payment flows and speed of on-demand pay disbursements.

Give on-demand pay firms and employers real-time access to wages and tracking tool.

Get seamless and automatic reconciliation of payments with full visibility and control over payment flows. Save on operational cost.

Leverage the speed and security of global payment networks and Modulr's SLA-backed service uptime.

Offer unbanked employees pay cards with available spend, or immediate access to tips or mileage reimbursements at end of shift.

Easily integrate new payment services from the wider Modulr platform to expand the stickiness of your proposition.

Results/customer testimonials

We look to pick really high calibre partners that we believe in, and then go on a journey with them, utilising more and more of their existing capabilities but also working together to develop new functionalities so that we can deliver even more value to our customers.

Nick Rogers, VP of Engineering at Wagestream

About Modulr

Modulr is the Payments as a Service API platform for digital businesses. Modulr's new type of payment accounts are built for businesses that need a faster, easier and more reliable way to move money.

Businesses can automate payment flows, embed payments into their platforms and build entirely new payment products and services themselves. All managed in real-time, 24/7 from one API. We've processed over £100bn for the likes of Revolut, Sage, Wagestream and Hyperjar.
