sage

Modulr

How it works:

Set up employees in Sage Payroll

↓

Automatic step
Employee records pushed to SS&SP

↓

Authorise new employees

↓

Select employees that need to be paid and click "pay"

↓

Automatic step
Payments automatically pushed to SS&SP

↓

Authorise payments

↓

Automatic step
Payments are reconciled back to accounts

Help us to process your payroll more efficiently

You've received this document because we think you'd benefit from Sage Salary and Supplier Payments, powered by Modulr.

We highly recommend this solution to all of our valued clients. It allows us to perform your payroll administration in a more streamlined and secure way.

What is Sage Salary and Supplier Payments?

An online solution that allows your accountant to securely make payments on your behalf to employees and suppliers.

The payments are processed directly from Sage products, including Sage50cloud Accounts, Sage50cloud Payroll and Sage 200cloud.

What's wrong with the current system?

Currently, you receive a payroll spreadsheet or report from us with payment details. You then have to manually upload and process these payments through your online banking system.

This involves unnecessary and time-consuming admin for you. It also obscures our visibility of your cashflow, which can slow down reconciliation and lead to delays in processing time.

How will this improve it?

With the new solution, we'll prepare your payroll and submit the information to you through a secure portal. All you need to do is click approve – no more emails or spreadsheets to worry about.

You can then fund the payments with a single payment, initiated at the same time as your approvals, which is much faster and more convenient than traditional online bank transfers.

This frees you up to focus on what you do best – growing your business.

☑ **Give your accountant better visibility of your cashflow**

☑ **Approve payments in just a few clicks, instead of manually uploading them**

☑ **Your payroll is managed efficiently in a single, regulated and secure platform**

How do I get started?

As your accountant, we can help you get set up with Sage Salary and Supplier Payments.

Simply **reply to this email** or give us a call for more information.
